

r16.0.1 Changelog

+-----+
| r16 Release - 60308
+-----+

Release day - 20th August 2019

Bugs

- [DSOF-7942] - Remove missing resources will not remove any unless all missing resources in tab are unused
- [DSOF-11564] - DMX screens should not render on slaves that aren't outputting DMX
- [DSOF-11574] - Cue List: Invalid string notification and broken UI when creating CUE tag and note
- [DSOF-11576] - Cue List: Float division by Zero notification and broken UI when creating CUE tag
- [DSOF-11583] - Unable to import feed rectangle tables from other projects
- [DSOF-11586] - Access Violation when loading a LUT file assigned to a screen but not present in folder
- [DSOF-11595] - Cue list: Moving horizontal scroll bar clears cue list
- [DSOF-11598] - Stability of DPX sequence playback is reduced by larger amount of layers when overall pixel count is kept the same
- [DSOF-11630] - DMX SPR driver updates regardless of change in input, thereby causing large position jitter.
- [DSOF-11643] - Incorrect expiration warning for Notch license
- [DSOF-11668] - HAP files give errors or don't appear in r16
